Pyrin is a member of the nucleotide-binding leucine-rich repeat (LRR) family of proteins and is one of the components of the inflammasome. Interaction with pyrin and a variety of associated proteins results in assembly of a large multiprotein complex named the inflammasome. This complex is a highly conserved platform that allows for sensing of specific stimuli by pattern recognition receptors and activation of caspase-1. Here, we discuss the structure and function of the inflammasome and the pathophysiological relevance of pyrin in inflammatory processes and in bacterial infection. While many Democrats have grown wary of the notion of impeaching President Donald Trump, Speaker Nancy Pelosi (D., Calif.) argued on Wednesday that it is imperative for them to seriously consider it. Pelosi spoke to the Washington Post about the impeachment inquiry into Trump and what her party should do to move forward. "The case is very clear, in terms of what the facts are," Pelosi told the paper. "It's very clear to us that we need to go forward 82157476af
